

FONT 50 *Wall-Mounted Bottle Filler*

The Font 50 is a wall mounted bottle filler that dispenses filtered mains water. It features a plastic bottle saving calculator. Every 500ml dispensed counts as saving 1 plastic bottle. Easy to install secure wall bracket which allows for quick filter replacement. The Font 50 is ideal for educational institutions, gyms, hotels and more. Stainless steel covered waste drainage.

- Connects to the mains water supply.
- Features a plastic bottle savings counter. (Every 500ml dispensed counts as saving 1 plastic bottle)
- Can be upgraded with optional mains water drainage.
- Superior dispense height of 38cm, ideal for filling sports bottles.
- We recommend installing a carbon block filter to remove the taste and smell of chlorine in the mains, and also prevents impurities from entering the water trail.
- Alternatively, a more sustainable solution would be to connect our reusable filter housing (FILTHOU) paired with a carbon block filter candle (FILTCAR) or a Nanofilter (NANOF) candle, either of which can be recycled with household waste.
- Made from high quality stainless steel, the Font 50 is suitable for indoor or covered outdoor installation.
- Supplied with everything you'd need for installation.

The FONT 50 is an eco-conscious product, that reinforces sustainable choice and promotes hydration. Every 500ml of water dispensed counts as 1 plastic bottle saved from landfill waste.

Code	Dimensions (mm) HxWxD	Dispense Height	Gross Weight
