

The NEW AA4400X BOTTLED

range of water coolers with HygieneGuard

Building on the success of the AA3300 range, the NEW AA4400X Bottled cooler combines proven Reliability, Functionality and increased Hygiene with outstanding Design and Elegance

Modern push and hold solenoid buttons avoid the risk of leaving the tap running by mistake, and the new HygieneGuard reduces the risk of contact contamination.

The AA4400X range is available in Anthracite with Silver livery. It can either come as a POU or a Bottled unit. All AA Coolers can be converted from Bottled to POU to save money and/or maintain optimum flexibility.

The full AA4400X range consists of

- POU or Bottled Coolers
- Floor Standing & Table Top
- Ambient/Cold & Hot/Cold
- With HygieneGuard Tap Cover
- It can also be provided with SIP overnight Self Sanitisation AA SIP4400X

AA
WATER COOLERS

The AA4400X series of Bottled Water Coolers

New HygieneGuard Tap Cover

The most critical hygiene area is undoubtedly the tap, which often gets contaminated through user hand contact (by comparison the "waterside" is much less critical). A silver impregnated plastic tap cover is designed to stop bacterial growth from contact contamination. The HygieneGuard tap cover can easily be replaced.

Cabinet

Cold-rolled 20 gauge embossed steel with baked on acrylic enamel finish

Drip Tray

Lift out design which can be connected to mains drainage, High impact durable plastic. Removable anti splash grid

Taps

Modern push and hold solenoid taps replace the old fashioned manual taps. The push and hold action prevents leaving the tap running by mistake whilst operating as a safety tap mechanism at the same time. The spouts of the solenoid taps are protected by the new HygieneGuard tap covers. Their silver impregnation is designed to prevent hand to tap bacterial contamination

Cup Holder

Integrated cup holder with exposed locking nuts to open up for easy refilling of cups

Removable Lower Front Panel

Spring loaded lower front panel. Remove drip tray and simply press down to remove entire lower front panel for easy access.

The AASIP4400X model

This model comes with SIP Ozonation which automatically sanitises the Cooler for 5 minutes at 2am every 24 hours through a burst of Ozone into the water tank and system. SIP Ozonation has been thoroughly tested and it has been accepted that it reduces the need for hard sanitisation of Coolers by half (POU Coolers from 2 x to 1 x per year and Bottled Coolers from 4 x to 2 x per year). SIP Ozonation represents a significant advance over UV and other sanitising methods

Refrigeration System

Quiet, air cooled static-type condenser. No fan required. Protected against motor overload. Unit hermetically sealed. R-134a refrigerant

Cooling System

Stainless Steel 3 litre cold water tank. Thermostatically controlled to 4C - 12C

Heating System

Stainless Steel 2 litre tank. Thermostatically controlled to between 87 and 92°C.

Designed to prevent total drainage for heating element protection. Easily accessible hot water tank drain at the back of the Cooler

Power Supply

220 Volt, 50/60 Hz. Provided with a 3 pin plug and 180 cm power cord

Dimensions

Floor Standing:	Height	1165mm
	Width	340mm
	Depth	340mm
Table Top:	Height	488mm
	Width	340mm
	Depth	340mm

Shipping Weights

Floor Standing:	18kg
Table Top:	15kg
