

# COSMETAL RIVER

Floor Standing & Wall Mounted  
Chilled Water Fountain with Bubbler & Swan Neck

## Description

The COSMETAL River is WRAS approved. The River ICE BANK is mains connected and has a facility for drainage. In contrast to other Fountains, the River has a sealed Ice Bank which is pre charged with chilled water. This is designed to provide large quantities of constantly low temperature water. Ideal for public areas, for government and semi government locations, for schools and universities, sports centres, hospitals, and medical facilities.

High output capacity of 30ltr per hour. The Swanneck has a dispensing height of 23cm, which is ideal for sports bottle filling. Both the floor standing and wall mounted River models are fitted with a Swanneck tap and Bubbler. The River has a low draining point and the installer must be mindful to ensure that the Ice Bank cannot syphon drain water back into the Ice Bank. Quality build from Cosmetal.

Product Code	Description	Dimensions H x W x D mm
CERIVER30C6	Floor Standing Fountain	960 x 330 x 330
