

EZYTAP

AC800

NEW DESIGN - JUST AS EZY

(Pictured with EZYTRAY 3)

Features

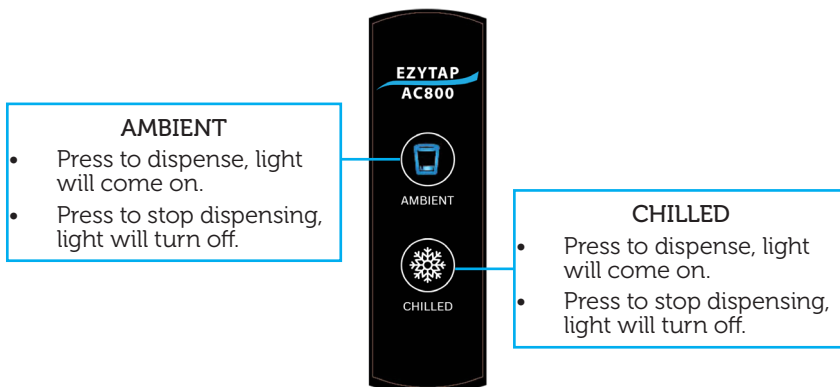

- EZY to use with just two buttons, one to provide ambient & one for chilled water.
- The chilled water is supplied by an undersink chiller (UC800M) which produces 11.5ltr per hour of between 6 – 10 C water. The EZYTAP AC800 also provides ample quantities of ambient water.
- The UC800M undersink chiller is a compressor chilled cooler. The undersink chiller must be installed with 5cm ventilation space all round, to assist chilling.

UC800M Undersink Chiller

- The EZYTAP AC800 dispensing Tap features a new stylish design, suitable for up market environments.
- It has a 24cm dispensing height, suitable for filling sports bottles.
- The EZYTAP AC800's electronic control panel sits in the head of the dispensing Tap. See below overhead view of the dispensing panel which shows the functions of the EZYTAP AC800.

EZYTAP AC800 Dispensing Panel

Drip Tray

- The EZYTRAY3 is not part of the EZYTAP AC800. It can be purchased separately. The EZYTRAY3 comes with an Installation Template and a drain away kit which includes a 1m length 22mm internal diameter waste pipe to connect to waste.
